Pressure reducing valves made of lead-free gunmetal with threaded connections

→ Series 9000

■ MATERIAL

■ SPECIFICATION

1/2" - 2"

Inlet pressure: up to 16 bar / 25 bar Outlet pressure: 0,5 - 12 bar

■ SUITABLE FOR

Potable water cold up to 40°C

Potable hot water up to 85°C

■ EXAMPLES OF USE

Protection of water supply systems in single-family homes, apartment buildings, commercial and industrial buildings or machines against excessive supply pressure. Usage of pressure reducing valves when a constant supply pressure is required in the system.

- Protection against overpressure
- Increase of comfort and reduction of water consumption
- Drinking water supply systems
- Service water supply in industrial and building services engineering
- Machines / plants connected to the drinking water network
- Irrigation technology / Cattle fattening

■ FEATURES

- First class flow rate and pressure control
- Filter screen with 160 μ m mesh protection of the system with easy cleaning and contamination detection with clear filter cup
- Housing made of lead-free gunmetal ready for the drinking water supply of the future
- High-quality plastic from medical technology sector
- Adjustment scale visible from two angles for adjustment without pressure gauge / operating pressure

■ APPROVALS

Series 9000:

Dimensioning by pressure loss on the outlet pressure side

Flow chart water

Pressure drop delta p [bar]

Dimensioning by flow velocity

For liquids:

With help of the chart you can determine the nominal diameter (DN) for a given flow volume V (m³/h). According to DVGW-guidelines (DIN 1988) a flow velocity of 2 m/s in domestic water supply systems should not be exceeded.
