#### Safety valve assembly made of gunmetal, straightway form with threaded connections

## → Series 669

# C€ FR FU

#### ■ MATERIAL

#### ■ SPECIFICATION

3,0 - 10 bar

1/2" and 3/4"\* -10°C to +95°C

\* DN20 only valid for variant sWK

#### ■ SUITABLE FOR

Warm water	<b>1</b> 40°C
	<b>*</b>

#### ■ EXAMPLES OF USE

For the protection of:

- closed circuit water heaters for drinking water and process water. The safety valve assembly is installed in the cold water inlet of the hot water heater. The use of this compact valve assembly ensures that the correct order of the valves according to DIN 1988 is adhered to.
- water heaters for potable and process water and -storage tanks
   The safety valve of the valve assemby is set and sealed at the factory.

#### ■ APPROVALS

European Pres	ssure Equipn	nent Directive
---------------	--------------	----------------

TR ZU 032/2013 - TR ZU 010/2011

Requirements

PED 2014/68/EU UK PESR 2016 No. 1105

## ■ MATERIALS

Component	Material	DIN EN	ASME
Inlet body	Gunmetal	CC499K	CC499K
Outlet body	Gunmetal	CC499K	CC499K
Internal parts	Brass	CW617N	CW617N
Spring	Spring steel with anti-rust protection	1.1200	ASTM A228

	/ERSION						
s	Standard	consisting of: shut-off valve, d return valve, non-return valve, on both ends.					
р	Version with pressure reducer	in addition to standard version equipped with a pressure reducer and a pressure gauge for to outlet pressure.  For water pressures over 4,5 bar it is necessary to install a pressure reducer on the inlet sid. The replaceable pressure reducing valve that is integrated in the safety valve assembly consists of a pressure-relieved single seat valve with stainless steel seat, strainer made of stainless steel and fabric-reinforced elastomere diaphragm.
