

Bicolour level gauge type black-white

Sight openings staggered, uneven number, lateral connection, protective LED-light tube

Application and function

The bicolour level gauge black-white is a direct level gauge with illumination and can be used for steam generators. For best results, observe the liquid level standing directly in front of the sight opening.

In the sight opening, the height of the liquid level is indicated in black and the steam space in white. The product corresponds to the PED directive 97/23/EEC art. 3 par. 3 SEP (Sound Engineering Practice). Applied rules as per TRD/AD2000 or ASME-Boilers.

Possible video transmission of liquid level onto a monitor in the control room.

Technical basic equipment

- Body material carbon steel
- As left sided (mapped) or right sided model
- Sight length see table
- With drain valve and ventilation plug
- Illumination device IP67
- Shutoff valves type A220 and A240
- Drain valve type AV500, AV 520

Available (optional) versions

- Body material according to ASME
- Other drain valve
