651mHNK VA

Safety valves made of stainless steel, angle-type with threaded connections

→ Series 651mHNK VA

■ SUITABLE FOR

Hot water

■ EXAMPLES OF USE

For the protection of:

 thermostatically protected closed-circuit water heating systems with flow temperatures of up to 120°C according to TRD 721, DIN 4751 and DIN EN 12828.

Should the thermostatic limiting and control unit fail, the safety valve has to blow-off the total heating output of the boiler as hot water and steam. Thanks to the all-metal design these safety valves can also be installed in cases of high environmental or radiation temperatures

- heating systems for building technology- and industrial-applications
- co-generation plants (CHP)

Safety valves are set and sealed at the factory.

■ MATERIAL

■ SPECIFICATION

1/2"

– 10°C to + 120°C

2,5 bar and 3,0 bar

■ APPROVALS

TÜV Type test approval 516	Н	
EC type examination	Н	

Requirements

TRD 721 DIN 4751 Part 2 DIN EN 12828 DIN EN ISO 4126-1 PED 97/23/EC

Classification society

American Bureau of Shipping ABS

■ MATERIALS

Component	Material	DIN EN	ASME
Inlet body	Stainless steel	1.4408	CF8M
Outlet body	Stainless steel	1.4408	CF8M
Spring housing	Nickel plated brass	CW617N	CW617N
Internal wetted parts	Stainless steel	1.4404	316 L
not wetted parts	Brass	CW617N	CW617N
Spring	Spring steel with anti-rust protection	1.1200	ASTM A228

■ VALVE VER	SIUN		
m	Standard with diaphragm	The diaphragm prevents the medium enter parts from being affected by the medium.	ing into the spring housing and protects moving

In this table you can configure a valve according to your individual requirements (similar to the *example* shown, which should be deleted before you enter your own data). Please complete the table by hand using the abbreviations in this datasheet and then fax it to: +49(0)7141.4889488 Please do not forget to add your personal data so that our sales team can contact you.

■ CAPACITY TABLE

Series 651mHNK VA: Blowing-off rates at 0,5 bar above set pressure						
	Nominal diameter DN		15			
	Set pressure bar	kW	Kcal/h			
Hea	ating 2,50	50	45.000			
	3,00	50	45.000			

To achieve heating output according to TRD 721, up to three valves per system with separate discharge pipes can be installed.
